

30006 Actuator

30006 is a rotary motion, non-spring return actuator. It is used specifically with ESBE mixing valves in sizes ½” to 2”. The 30006 has a manual override as standard. Mounting hardware for the mixing valve comes with the actuator. A model with one auxiliary switch is also available.

Control mode	3-point floating
Torque	45in. lb
Power	24 Vac, 3VA
