All you Need for **THE BEST** Radiant Heating Systems

Infloor Heating Systems is a pioneer in the radiant heating industry, designing and providing systems since 1984. Infloor specializes in hydronic and electric radiant heating, snowmelt systems, and integrating energy-saving solutions such as solar and geo thermal.

Radiant heating is the most comfortable heating method because it heats the space where people live, is completely silent, and is a healthier way of living for those with allergies. It is also energy-efficient, reducing gas and electric bills, eliminates duct work and duct losses, is low maintenance, and build to last.

RADIANT HEATING IS THE SUPERIOR CHOICE IN SPACE HEATING & FLOOR WARMING

- ✓ Comfortable, even heat
- ✓ No air borne pollutants
- ✓ Complete design freedom
- ✓ Low Maintenance
- ✓ No vents or duct work
- ✓ Energy efficient
- ✓ Built to last
