

## Did You Know?

We are a pioneer in the radiant heating industry, designing and providing systems and solutions since 1984. As a company, we have evolved with the industry and have forged new frontiers with our unique, innovative designs and products, such as Radiant Trak, Infloorboard III, and custom mechanical boards. We take great pride in offering premium systems and products that help people live more comfortably and healthy, giving them more control over their heating, while reducing energy use and costs. So, how can we help you?

## Join us at the Colorado Garden & Home Show in Denver, Feb. 13-21

We are thrilled to be returning to the Colorado Garden & Home show this year. We will be unveiling a new 10'x10' exhibit booth at this show, and will be talking about the many benefits and features of Infloor Heating Systems. Plan to join us at there any day between Feb. 13-21 at the Colorado Convention Center (located at 700-14th Street in Denver), where you can find inspiration from the latest ideas and trends in landscaping, gardening, and home improvement.

We will be located next to Hi Valley Supply in booth #1552. In addition to our new exhibit booth, we have new product literature and stickers, and will have different products and components on display. Learn about our newest product Infloorboard III, rolled out last year, check out our tubing and electric cable, and much more. And best of all, we will be there to answer any and all of your questions about radiant heating systems and their power sources.

## Save Big With Programmable Thermostats

Installing a programmable thermostat can save you big on your energy bills! According to the US Dept. of Energy, you can save an estimated 10% a year on heating and cooling costs by simply turning your thermostat back 7°-10°F for 8 hours a day from its normal setting. (If you have a heat pump, don't do this without a programmable thermostat). You can do this automatically by using a programmable thermostat and scheduling the times you turn on the heating or air conditioning. As a result, the equipment doesn't operate as much when you are asleep or not at home.

One of our newest options is a Remote Touch Thermostat (#29070) for Electric Cable, offering all the things you expect from a smart touchscreen thermostat – intelligent, adaptive control, intuitive operation, easy installation, plus WLAN connectivity for remote control.

# Colorado Garden & Home Show in Denver Continued

While at the show, you can also attend one of their 50 FREE educational seminars and how-to demonstrations in the Theater at the end of aisle 1100 for cutting edge gardening and home improvement ideas. Session topics include How to Plan Your Outdoor Living Space, Costly Mistakes to Avoid When Remodeling a Kitchen or Bath, Understanding Your Home: Plumbing and Electrical Systems, Plant What Grows in Colorado, Succession Planting for the Colorado Vegetable Garden, and much more. Visit their website to see the full list of sessions being offered and the schedule. Sessions are free with the price of admission.

And don't miss the flower sale! On Wednesday, February 17 beginning at noon, fading show flowers will be on sale to the public for \$2 per pot with the proceeds going to the Arvada Rotary. Most of the potted flowers are perennials and are great deal for those looking to add to their gardens, or to bring some fresh color into their homes.

The cost of the show is \$12.00 per adult and \$10.00 per senior; kids 12 and under are free. Save \$2 off the admission price by donating a non-perishable food item to *9Cares Colorado Shares*,

which can be redeemed at the ticket box office or you can purchase your tickets in advance at all participating King Soopers.

If you're into your home and gardening, this is the event for you! Come on out, learn something new, and get to know us at Infloor Heating Systems. We look forward to seeing you there!

## Snowmelt Sensors Ensure You Always Arrive to a Clear Drive(way)

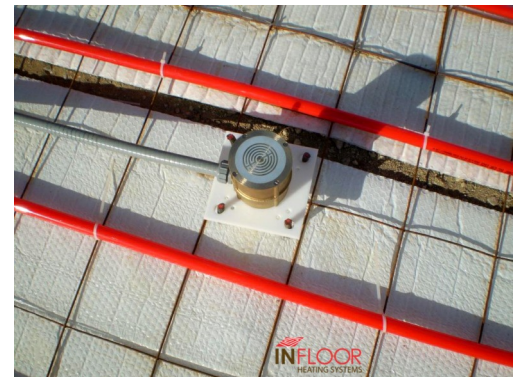

Don't let the weather get you down. Rest assured your family and guests always arrive to a clear and safe driveway, walkway, stairs, and patio. Our reliable Snowmelt systems easily install in concrete, asphalt, and under pavers to keep your outdoor areas free of snow and ice, giving you added peace of mind all winter long. Snowmelt systems can be used in any number of applications, including in warm climates for evening outdoor comfort heating at homes and businesses, such as a restaurant with an outdoor patio.

Infloor Snowmelt systems are generally automated. A sensor is installed in the surface of the heated area that monitors both temperature and moisture.

Therefore, the system only runs when needed. The sensors prevent the system from running when the weather is cold but no snow or ice is present or there is moisture but the weather is warm enough to prevent freezing. These types of controls are considered weather responsive controls that are used with on-demand systems.

Once you've installed an Infloor Snowmelt system, you'll never have to shovel snow or worry about an icy surface again.

Contact us for a personalized quote. We can answer any questions you have and design a system specific to your project's requirements.

Weather-responsive controls turn your system on only when it's needed.
